(a) Design plane
total_length L (μm)
capacitor_length c (μm)
Step 2
Step 1
3
2
1
first leg, from the initial design
(620, 5000) μm, below the plot
(b) Cost to the criterion
err
Palace runs
Newton (geode gradient)
PRIMA, published end point
DeviceLayout's criterion
(c) Converged qubit
Frequency (GHz)
published
final
Step 1
Step 2
(d) Converged resonator
Frequency (GHz)
published
final
Step 1
Step 2
published final (PRIMA)
Newton, DeviceLayout's discretization
Newton, converged frequencies
step-2 qubit band mapped to c (estimate)
converged estimate
estimate band (not a bound)
target (3.0, 4.0 GHz)
