(a) Design plane
Step 2
Step 1
3
2
1
first leg, from the initial design
(620, 5000) μm, below the plot
total_length L (μm)
capacitor_length c (μm)
(b) Palace evaluations to the criterion
Newton, geode gradient
Newton, scaling law
Broyden
PRIMA (published)
criterion
err
Palace evaluations
(c) Extrapolated qubit
Frequency (GHz)
published final
Step 1
Step 2
scaling step
(d) Extrapolated resonator
Frequency (GHz)
published final
Step 1
Step 2
scaling step
published final (PRIMA)
geode-gradient Newton, DeviceLayout's discr.
geode-gradient Newton, converged frequencies
scaling-law Newton, DeviceLayout's discr.
scaling-law step, converged frequencies
step-2 qubit band mapped to c (estimate)
extrapolated estimate
estimate band (not a bound)
target (3.0, 4.0 GHz)
